BUSINESS PROBLEMS AND VALUE STATEMENTS

How do I safely allow visitors / shoppers / guests into my space?

Utilize the Taos to enable a quick health assessment, sanitize hands, and provide instructional social distancing messaging. Place at least one unit at each entrance and leverage TouchSource safety messaging and posters. Deploy contactless Mobile Directory and Mobile Wayfinding to support safe visitor movement throughout the facility

How do I safely support my employees or occupants as their return to work?

Utilize the Taos at employee entrances or parking garage vestibules to perform health-check self-assessments. Add additional compliance through contactless mobile compliance or social distancing open space reservations

How do I safely allows vendors and contractors back into my space?

Deploy the Taos at vendor check-in locations. Deploy vendor check-in forms with acknowledgement of safety and health requirements. Maintain auditable list of vendor compliance. Integrate with contactless visitor concierge for calling to tenants.

What happens when this "whole COVID thing" is done? I don't want to waste money.

The Taos is designed to be a fully functioning digital information board. It supports directory functionality, mobile wayfinding, messaging boards, marketing boards and a full suite of applications while maintaining the simple hand sanitizer functionality. The temperature functions can be disabled easily or transformed to proximity sensors for interactive experiences in the future.
